Summary and Recommendation

Offering an estimated median 8.6% cash distribution yield and trading at a median McDep Ratio of 0.77, Oil and Gas Income stocks look like attractive investments for participation in oil and gas price and volume trends. We estimate stable to rising distributions for the year ahead at constant benchmark prices of \$70 a barrel and \$3 a mmbtu (see charts [Latest Four Quarters Distribution](#) and [Latest Twelve Months Distribution](#) on page 2). Distribution trends are updated for latest disclosures on October 18-19 (see tables [Operating and Financial Estimates](#) on pages 3 to 7).

- **Dorchester Minerals (DMLP)** has advanced the most in 2018 as evidenced by its climb from second lowest McDep Ratio at the beginning of the year to highest now. Yet 0.79 is not high among all stocks in our coverage. DMLP's lowest present value to cash flow multiple (PV/Ebitda) hints that we may not have given full value to the current level of cash generation.
- **Cross Timbers Royalty Trust (CRT)** has also advanced in 2018 helped by a steady upward trend in latest twelve-month distribution. We think there is more outperformance potential considering CRT's lowest McDep Ratio.
- **San Juan Basin Royalty Trust (SJT)** may be a surprise outperformer from here after declining sharply in 2018. A highly cyclical distribution trend has turned up again.
- **Sabine Royalty Trust (SBR)**'s stock price decline may reflect a lower than estimated oil price in the third quarter, perhaps related to temporary discounts in the Permian Basin. A new investment commitment to the long-term, high quality performer seems readily justified at current price.
- **Permian Basin Royalty Trust (PBT)** pays a steady distribution while price gains offset natural volume declines. The Permian Basin temporarily has more producing capacity than transportation capacity to market.

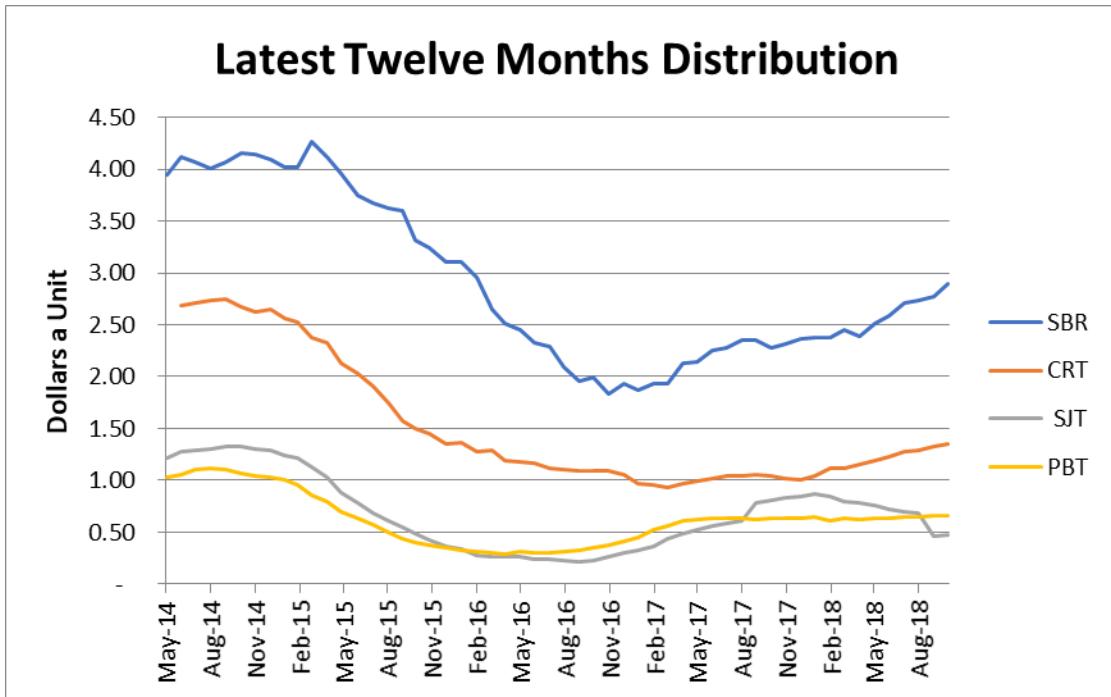

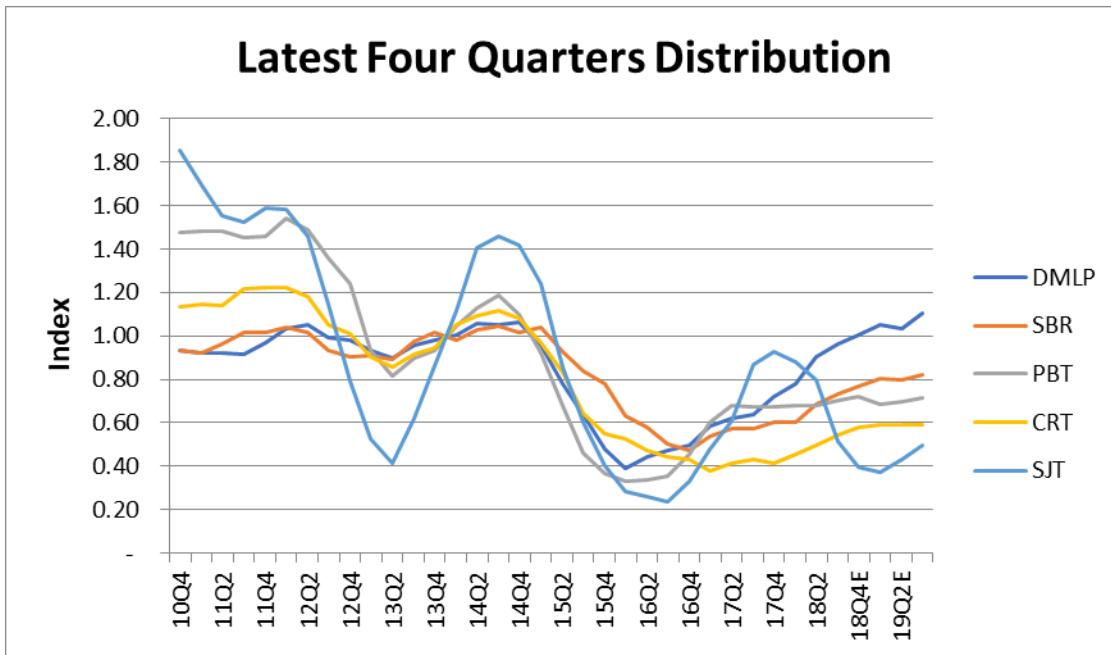

We believe small cap Income stocks provide inexpensive value among the five groups in our coverage (see [Table 1-4](#) on pages 8-11).

EV = Enterprise Value = Market Cap and Debt; Ebitda = Earnings before interest, tax, depreciation, amort.

Estimated Ebitda (cash flow) tied to one-year prices of US\$70 a barrel and \$3 a million btu. NTM = Next Twelve Months ending 9/30/19.

Estimated Present Value (PV) presumes a long-term price for oil of US\$70 a barrel and natural gas, \$4.00 a million btu.

McDep Ratio = Market cap and Debt to present value of oil and gas and other businesses. For historical research see www.mcdep.com
