

Natural Gas Royalty Trusts

A Weekly Analysis

April 1, 2002

Development Outlays Lower

Occasionally royalty trusts face a classic crisis/opportunity when high development spending reduces distribution in favor of higher future production. The short-term crisis has now passed and the long-term opportunity is kicking in. Investors in HGT and SJT faced that dilemma late last year (see chart on next page). SJT unitholders bore the brunt of large outlays when gas prices were low. The sponsor of HGT smoothed the monthly deductions at that time. Gratefully, CRT unitholders have obligations on only some properties and are not responsible for development spending on most of their properties. Meanwhile during the short pre-holiday week estimated present value decreased 1%, 2%, and 2% for CRT, HGT and SJT respectively. Estimated Next Twelve Months distribution decreased 1%, 4%, and 3% for CRT, HGT and SJT respectively. The declines are small compared to recent gains.
